

IN THE CLAIMS:

The status of the claims is provided:

Claims 1-36 (canceled)

37. (currently amended) A semi-finished wood composite structure comprising:

- a) a wood composite substrate;
- b) one or more die-cut foil pieces uniformly coating at least one portion of a surface of the wood composite, **said die-cut foil pieces comprising a removable carrier film with a transferable film thereon; and**
- c) an overlaying foil uniformly coating the surface of the wood composite **and said die-cut foil pieces, said overlaying foil comprising a removable carrier film with a transferable film thereon.**

38. (original) The structure of claim 37, wherein the wood composite possesses a smooth surface.

39. (original) The structure of claim 38, wherein the wood composite possesses an embossed grain pattern.

40. (original) The structure of claim 37, wherein the wood composite possesses a textured surface.

41. (original) The structure of claim 40, wherein the wood composite possesses an embossed grain pattern.
42. (original) The structure of claim 37, wherein the wood composite is a molded wood composite, post-molded wood composite, or semi-molded wood composite.
43. (original) The structure of claim 42, wherein the wood composite included both flat surface portions and contoured surface portions.
44. (original) the structure of claim 37, wherein the overlaying foil has been removed from the portion(s) covered by one or more die-cut foil pieces.
45. (original) The structure of claim 42, wherein the wood composite is a fiberboard.
46. (original) The structure of claim 45, wherein the fiberboard is selected from the group consisting of hardboard and medium density fiberboard.
47. (original) The structure of claim 42, wherein the molded wood composite has a thickness of about 1/8-inch to about 1 5/8-inches.
48. (original) The structure of claim 47, wherein the molded wood composite has a thickness of about 1/8-inch to about 1/2-inch.
